On this page I describe

without a chocolate chip
in sight Oval and
shining with a black strap
bathing cap The page

texture slightly off
Cotton sheets with pillow

or a print PRINT JUST A

inches long and stuffed
or flat and crisp cigarette

It used to be every sponse

dont we are accustomed
The white race is late

The white race is late coming
to consciousness said Coyote
It didn't live with wild
animals or many-colored
birds It always
wore clothes The white
race is on this page
written in ink of color
The white race uses a lot
of periods. and some...
a lot of the white race
goes to church and here
in this country many are
white Many have steeples
All have doors The winter
is white here too So are
the paintings of Robert
Ryman and the frames
on many other pictures
hanging on white walls
The walls of the Whitney
are white Here is the end

Here is the end which is at

the beginning of this page
Here is the end which is at
you ever think of that
when you write it did
when you read it only
The pause is not noticeable
and causes a pause
space is decreasing now
on another line the white

another will it be clear
and one line runs into
the top of the page comes
not enough space when
different what if there's
your way up it's not so
at the bottom and work
backwards so you start
This page is going to be written

This page is going to be written
forward All the words and
lines follow one another
in sequence Like the world
was created and Adam was
made if you read the book
which tells that story
Otherwise forward begins
in the sea flaps to the
shore and grows legs
stands up and beats its wife
Then we have history
and culture and social
science and institutions
Institutions is a long
word with three i's
I's denote ego the self
which is already defined
with only one i but 2 e's
making thee or he and she
and pronouns make more
people all with ego's and i's
all i's are on this page

All eyes are on this page
including a change of spelling
to coincide with the change

of meaning That's not very
clever but is how the
language spells itself
including some meanings
Meanings make you think
of about instead of what's
on the page about is a
word you can use all by
itself which is a pronoun
referring Referring is a
long article about the
referrent which attaches
reminds and is owned
Itself is owned by about
They lock you up for such
nonsense

WHICH

which is a play on words
by witches of writing
We know all the meanings
and all the property which
caused a scandal for several
centuries But you can't
own the mother earth
This is a sacred tradition
preserving the gold under
ground where no one can
be greedy about it and
keeping the uranium buried
so no one can blow
allthemselves up There are
politics everywhere including
the language which commands
obedience to its meaning
Be careful what you say
in a business letter because
people conform All the
treaties were broken so
written is not the truth

Written is not the truth
How many lies can you
find on this page? I am
35 years old and writing
my first poem. Three
periods have been used
so far Jackson will be

pleased because this is
just writing Bruce will
die from the sequence and
Abigail will cut up all
her film again Abigail
and Henry are people
Charles is a writer with no
two words alike Barbara
who gave me this book
takes pictures and put
none in this book leaving
me room for description
of people and words which
are written

BLANK PA

BLANK PA

GE

ge a shortened form of gee
or get or gentlemen or gerund
but none of these are useful

G

is spelling a letter
which stands for gum

bubble and chew and is
printed or type
in the middle of the line
The middle of the line is
equi-distant between the
margins and is something
I do in my books Look
to right or left when reading
this G or crossing the street
Useful information is not
always dull Neither is
shiny The bottom of
the dull white page with
margins is coming up
soon - coming up as
soon as I get this
writing down to it

Writing down to it now
from the very top with all
this white space to please
White are hills with snow
where I skied on black
skis with white letters
when I was owned by a
business firm in the culture
I put lace and flowers
and buttons on things to please
White sold the best
Sheep are nautral white

all across the world to

of it will go

WHITE SHEEP

White sheep come in black
and grey and brown
giving us a natural variety
in sentences All the

sentences here are completed
just as sheep have feet
and walk on them Complete
is useful to a sheep but
not to a sentence which can
stop anywhere and let
you fill in the

LIKE BLAN and I add a K

and white sometimes especially
if you're poor If you're
poor you have a white sink
but you might have a
stainless steel one if you
are rich or a restaurant
The woman said
she was white as cheese which
goes in the refrigerator which
is likely to be white but
you can paint it White
foods that go in the refrigerator
are cheese sour cream cream
milk fish and Cool Whip
Foods that are white inside
are onions potatoes and
apples The Indians have
a joke about apples that
means you might work
for the government You
can guess what the joke is

The joke is because of
financial difficulties, the

brutal conditions at Marion
Penitentiary, an immediate

and so (seen) with the spirit
of Crazy Horse we close.

Tempting myself pen in hand the writer
to equi-distance between margins I turn
the book awkwardly and write the long way
the long way across the page with the cover
flopping over and no even surface
to write on

THIS IS PRINCIPLE

This is principle to sacrifice comfort
for a long line equi-distant between
margins and sleep on the floor between walls
Between walls is where all the furniture is
and the books and the people

THAT IS SPACE

That is space longer across than down
that I write on and contrary to habit
The white space still goes from left to right
and we read the words across and then
down

THIS IS SLEEP

This is sleep we could write this in
or read this in the sleep of consciousness
which imposes no telling the truth (seen)
is just telling a little tale alertness
to grasp meaning or language

THIS IS LANGUAGE

This is language this is written in but
the ordinary form of the simple spoken
word

THIS IS OMITTED

This is omitted - the difficulty and
pleasure of language used to open
and tempt the mind of the reader
to new experience and new form

THIS IS OBJECTIVE

This is objective although this is also
my personal experience as a writer
and the personal experience of writing
goes down with each word on the page

THIS IS WORD

This is word spelled backwards is drow
which is how English amuses me
because you can draw in the a

THIS IS IMPOSSIBLE

This is impossible to finish at one
sitting

AND SO

SO WE CONTINUED

continued
seen (necessary
line breaks) vary
across the slant of
the page each line
a different space to the margin
confusing the breath of the mind
the length of the thought on the
page is flat and has an edge
and to disobey the government of the
margin is to lose the line out to

like out to the edge me or
swimming in a short pool
I feel a few more strokes of the
pen are necessary to complete me
forming words which will
sometime be read and space
and less space which
inhibits the hand
and fewer words
come from
the

the
pen or the
mind of the
reader or writer
whoever interprets
this simple sentence
will have written it
the owner of the line is the
margin which refuses to give
any sense of rhythm in this
varied length the expectation is
confused in the mind and the hand
and each beginning of a line must be
begun anew with a different rhythm
or expectation or whatever word will fit
in the space left out to the margin
This is writing slantwise diagonally
across the page and gives no
consolation either of sound
or of word groups it
just finishes the
space and
repeats
itself

itself
writes about
itself writing
on a slant across
the page and does
not put in the word
that was thought of for
lack of space the line
thought of running was lost
but was about form and space

form and space make it difficult
to say everything but so does history
and political aesthetics allow leaflet
but not leaf not even the leaf of
a book that's a page the question
is whether the margin should stand
and is the end of the page a natural
law perhaps the best thing
is to FINISH THE PAGE
and let the reader decide

some disobedience
here

here
a blank
book complete-
ly engaging
the reader to be
writer and so be-
coming a book written
by the writer which it
was not to begin with
it was not to begin with a book
with words or pictures in it and so said
how much blankness will engage
the reader to become writer and now
the blankness is going away and
the white space is filled by this pen
and the margins have not given in
but have varied themselves
and so has the space this
is because a book was
not written this book
is written and
soon comes
to an end
that

that
repeat word
comes soon
on a new page
and the whiteness
is gone and the
margins met on four
sides of the page and

agreed to keep the writing
inside This is the law of
the margin even when broken the
what is lost is the word is lost but
can be repeated on another line
giving in to a form of concensus
a meeting an agreement of four
and the agreement about finishing comes
with the last page which is next and
after that there is no more that
finishes an attempt to fill
in all the spaces left
by a writer in a

not too much concerned with
ending but filling out to the margin

where along the space diminishes
and the last page finishes the book
